P62 Q34 (98.09.08) B65D 85/00, B25H 3/02, H02B 1/30

The tool box consists of an open-closable lid (2) provided for its main body (1). The main body or the cover has an embedding type push-in plug (6) on its one side, for connecting main power source.

The push-in plug is connected to one or more AC outlets (8) provided parallelly for the electrical equipments. The AC outlets are also provided at one side of the main body or the cover. The push-in plug and the AC outlets are provided at a pair of adjacent sides of main body or cover.

ADVANTAGE - Avoids incorrect laying of power cord. (4pp Dwg.No.1/3)
